STOP ADDICTION FOR EVERYONE

“We prescribed Oxycontin for a serious back injury. Unfortunately, she became addicted and we had to refer her to treatment.”

ADDICTION IS A TREATABLE DISEASE: Chronic pain drugs including Oxycontin, Percoset, Vicodin, Demerol and Codeine are among the most highly addictive and dangerous prescription drugs. They are opioids and are in the same drug class as heroin.

YOUR PRESCRIPTION MEDS CAN BE SOMEONE ELSE'S PROBLEM!

KEEP YOUR MEDICATIONS SECURE.

**Drop off unused or expired meds at
Mt. Lebanon Public Safety Center
555 Washington Road**
