

S.A.F.E.

STOP ADDICTION FOR EVERYONE

“One of my friends swallowed a lot of pills on a dare. We called 911. It was scary.”

ADDICTION IS A TREATABLE DISEASE: Taking high doses of a stimulant such as Ritalin, Concerta or Adderall can cause an irregular heartbeat, dangerously high body temperatures and the potential for seizures or heart failure.

YOUR PRESCRIPTION MEDS CAN BE SOMEONE ELSE'S PROBLEM!

KEEP YOUR MEDICATIONS SECURE.

**Drop off unused or expired meds at
Mt. Lebanon Public Safety Center
555 Washington Road**
