

Control Devices

303.1 POLICY HEADER

Original Effective Date:	Revised Date:
September 1, 2021	January 4, 2023
Authorization:  Jason Haberman Chief of Police	

303.2 PURPOSE AND SCOPE

This policy provides guidelines for the use and maintenance of control devices that are described in this policy.

303.3 POLICY

In order to control individuals who are violent or who demonstrate the intent to be violent, the Mt. Lebanon Police Department authorizes officers to use control devices in accordance with the guidelines in this policy and the Use of Force Policy. The Chief of Police may also authorize other positions or individual department members to use specific control devices.

303.4 ISSUING, CARRYING AND USING CONTROL DEVICES

Control devices described in this policy may be carried and used by members of this department only if the device has been issued by the Department or approved by the Chief of Police or the authorized designee.

Only those members who have successfully completed department-approved training in the use of any control device are authorized to carry and use the device.

Control devices may be used when a decision has been made to control, restrain or arrest a person who is violent or who demonstrates the intent to be violent and the use of the device appears reasonable under the circumstances. When reasonable, a verbal warning and opportunity to comply should precede the use of these devices.

Application of devices will cease when the offender stops resistance or aggression, or when the arresting officer or officers have gained sufficient control of the subject.

303.5 RESPONSIBILITIES

Mt. Lebanon Police Department

Policy Manual

Control Devices

303.5.1 WATCH COMMANDER RESPONSIBILITIES

The Watch Commander may authorize the use of a control device by selected department members who may not currently be issued or carrying the control device or those in specialized assignments who have successfully completed the required training.

303.5.2 RANGEMASTER RESPONSIBILITIES

The Rangemaster or the designated instructor shall control the inventory and issuance of all control devices and shall ensure that all damaged, inoperative, outdated or expended control devices or munitions are properly disposed of, repaired or replaced.

Every control device will be periodically inspected by the Rangemaster or the designated instructor for a particular control device. The inspection shall be documented.

303.5.3 USER RESPONSIBILITIES

All normal maintenance, charging or cleaning shall remain the responsibility of personnel using the various devices.

Any damaged, inoperative, outdated or expended control devices or munitions, along with documentation explaining the cause of the damage, shall be returned to the Rangemaster or the designated instructor for disposition. Documentation shall also be forwarded through the chain of command, when appropriate, explaining the cause of damage.

303.6 BATON GUIDELINES

The need to immediately control a suspect must be weighed against the risk of causing serious injury. The head, neck, throat, spine, heart, kidneys and groin should not be intentionally targeted except when the officer reasonably believes the suspect poses an imminent threat of serious bodily injury or death to him/herself or others.

Uniformed personnel shall carry the baton in its authorized holder on the equipment belt. Plainclothes and administrative personnel may carry the baton as authorized and in accordance with the needs of their assignments or at the direction of their supervisors.

[For additional info on Baton procedure click here](#)

303.7 CHEMICAL MUNITIONS GUIDELINES

Chemical munitions may be used for crowd control, crowd dispersal or against barricaded suspects, based on the circumstances. The Critical Incident Response Team Commander, the SHACOG Support Team Commander or other mutual aid response team commanders, with the approval of the Incident Commander may authorize the delivery and use of chemical munitions, and only after evaluating all conditions known at the time and determining that such force reasonably appears justified and necessary.

When practicable, fire and emergency medical services personnel should be alerted or summoned to the scene prior to the deployment of tear gas to control any fires and to assist in providing medical aid or gas evacuation, if needed.

Control Devices

303.8 OLEORESIN CAPSICUM (OC) GUIDELINES

As with other control devices, OC spray and pepper projectiles may be considered for use to bring under control an individual or group of individuals who are engaging in, or are about to engage in, violent behavior. Pepper projectiles and OC spray should not, however, be used against individuals or groups who merely fail to disperse or do not reasonably appear to present a risk to the safety of department members or the public.

303.8.1 OC SPRAY

Uniformed members carrying OC spray shall carry the device in its holster on the equipment belt or the vest carrier. Plainclothes and non-field members may carry OC spray as authorized, in accordance with the needs of their assignments or at the direction of their supervisors.

[For additional info on OC Spray procedure click here](#)

303.8.2 PEPPER PROJECTILE SYSTEMS

Pepper projectiles are plastic spheres that are filled with a derivative of OC powder. Because the compressed gas launcher delivers the projectiles with enough force to burst the projectiles on impact and release the OC powder, the potential exists for the projectiles to inflict injury if they strike the head, neck, spine or groin. Therefore, personnel using a pepper projectile system should not intentionally target those areas, except when the officer reasonably believes the suspect poses an imminent threat of serious bodily injury or death to the officer or others.

Officers encountering a situation that warrants the use of a pepper projectile system shall notify a supervisor as soon as practicable. A supervisor shall respond to all pepper projectile system incidents where an individual has been hit or exposed to the chemical agent. The supervisor shall ensure that all notifications and reports are completed as required by the Use of Force Policy.

Each deployment of a pepper projectile system shall be documented. This includes situations where the launcher was directed toward an individual, whether or not the launcher was used. Unintentional discharges shall be promptly reported to a supervisor and documented on the appropriate report form. Only non-incident use of a pepper projectile system, such as training or a product demonstration, is exempt from the reporting requirement.

Officers are not required or compelled to use approved munitions in lieu of other reasonable tactics if the involved officer determines that deployment of these munitions cannot be done safely. The safety of hostages, innocent persons and officers takes priority over the safety of individuals engaged in criminal or suicidal behavior.

303.8.3 TREATMENT FOR OC EXPOSURE

Persons who have been sprayed with or otherwise affected by the use of OC should be promptly provided with clean water to cleanse the affected areas. Those who complain of further severe effects shall be examined by appropriate medical personnel.

Control Devices

303.9 POST-APPLICATION NOTICE

Whenever chemical munitions or OC has been introduced into a residence, building interior, vehicle or other enclosed area, the owners or available occupants should be provided with notice of the possible presence of residue which could result in irritation or injury if the area is not properly cleaned. Such notice should include advisement that cleanup will be at the owner's expense. Information regarding how and when the notice was delivered and the individuals notified should be included in related reports.

303.10 KINETIC ENERGY PROJECTILE GUIDELINES

This department is committed to reducing the potential for violent confrontations. Kinetic energy projectiles, when used properly, are less likely to result in death or serious physical injury and can be used in an attempt to de-escalate a potentially deadly situation. The kinetic energy devices include the extended range impact devices such as the 40mm.

[For additional info on Kinetic Energy Projectile procedure click here](#)

303.10.1 DEPLOYMENT AND USE

Only department-approved kinetic energy munitions shall be carried and deployed. Approved munitions may be used to compel an individual to cease his/her actions when such munitions present a reasonable option.

Officers are not required or compelled to use approved munitions in lieu of other reasonable tactics if the involved officer determines that deployment of these munitions cannot be done safely. The safety of hostages, innocent persons and officers takes priority over the safety of individuals engaged in criminal or suicidal behavior.

Circumstances appropriate for deployment include, but are not limited to, situations in which:

- (a) The suspect is armed with a weapon and the tactical circumstances allow for the safe application of approved munitions.
- (b) The suspect has made credible threats to harm him/herself or others.
- (c) The suspect is engaged in riotous behavior or is throwing rocks, bottles or other dangerous projectiles at officers, other department members and/or other people.
- (d) There is probable cause to believe that the suspect has already committed a crime of violence and is refusing to comply with lawful orders.
- (e) A vicious animal needs to be subdued.
- (f) Situations where an officer deems their use to be reasonable to safely resolve the incident and prevent escalation of an incident to a life-threatening situation.

303.10.2 DEPLOYMENT CONSIDERATIONS

Before discharging projectiles, the officer should consider such factors as:

- (a) Distance and angle to target.
- (b) The subject's proximity to others.

Control Devices

- (c) The location of the subject.
- (d) The size, age and /or weight of the subject.
- (e) The presence of an obvious or known medical condition.
- (f) Whether the subject's actions dictate the need for an immediate response and the use of control devices appears objectively reasonable to the officer

A verbal warning of the intended use of the device should precede its application, unless it would otherwise endanger the safety of officers or when it is not practicable due to the circumstances. The purpose of the warning is to give the individual a reasonable opportunity to voluntarily comply and to warn other officers and individuals that the device is being deployed.

Officers should keep in mind their training regarding effective distances and target areas. Each situation must be evaluated on the totality of circumstances at the time of deployment.

The need to immediately incapacitate the suspect must be weighed against the risk of causing serious injury or death. The head and neck should not be intentionally targeted, except when the officer reasonably believes the suspect poses an imminent threat of serious bodily injury or death to the officer or others.

303.10.3 SAFETY PROCEDURES

Any device specifically designated for use with kinetic energy projectiles will be specially marked in a manner that makes them readily identifiable as such.

Officers whose assigned vehicles contain these devices and projectiles will inspect them at the beginning of each shift to ensure that the devices are in proper working order and the projectiles are of the approved type and appear to be free from defects.

When they are not deployed, devices will be unloaded and properly and securely stored in police department vehicles or the armory.

303.11 TRAINING FOR CONTROL DEVICES

The Use of Force Committee Lieutenant or their designee shall ensure that those members who are authorized to carry a control device have been properly trained and certified to carry the specific control device and are retrained or recertified annually.

- (a) Proficiency training shall be monitored and documented by a certified control-device weapons or tactics instructor.
- (b) Control devices shall be inspected for proper condition, function and reliability prior to proficiency training.
- (c) All training and proficiency for control devices will be documented in the member's training file.
- (d) Members who fail to demonstrate proficiency with the control device or knowledge of the Use of Force Policy will be provided remedial training. If a member cannot demonstrate proficiency with a control device or knowledge of the Use of Force Policy

Mt. Lebanon Police Department

Policy Manual

Control Devices

after remedial training, the member will be restricted from carrying the control device and may be subject to discipline.

303.12 REPORTING USE OF CONTROL DEVICES

Any application of a control device shall be documented in the related incident report and reported pursuant to the Use of Force Policy.
